

168

The title *mevc-i deryâ* ('sea-waves') is common to 310 and 88.

1) H3 as written consists of nine and a half cycles, but repetition beginning half-way through a cycle (or rather not having 5-9 of the transcription distributed on their first appearance as in M 4-8) is here unconvincing. Preferable to editorial interpolation seemed the assumption of missing *prima/seconda volta* symbols segmenting off half a cycle as a variant.

3) Popescu-Județ. 15 (335-7). 1 = ♩. Time signature 8 : 8.

H1 1: 4 *dd*.

M 7: 3-4 *DF# DA*.
